## PROFILE

I am a south Hertfordshire based junior web designer with a strong proficiency in HTML, CSS & Adobe Photoshop/Illustrator CS6. I work to W3C web standards compliance and code all my websites by hand. With my final year of my masters qualification starting in September 2013, I look to expand upon my short term freelance experience until graduation in 2014.

## WORK

### Signet (H.Samuel & Citizen Watches)

I was commissioned by Signet to create a promotional microsite for Citizen's latest brand of economic watches. Working closely with the H.Samuel/Citizen design team, it was my duty to produce the HTML/CSS for their design proposals.

### University of Greenwich

With the existing Greenwich university distance learning site in need of updating, it was my task to propose a design alternative that brought all the fundamental course/faculty information into one, easy-to-use online resource for international students.

## SKILLS

- ✓ XHTML 1.0 (and HTML5)
